HUDSON CONTROL GROUP ANNOUNCES NEW EUROPEAN SALES REPRESENTATION

SPRINGFIELD, NJ (April, 2008)-Hudson Control Group recently announced the addition of Wagner Medical and Pharmaceutical to handle sales in continental Europe. The extensive experience of Jurgen and Ingrid Wagner will enable Hudson Control Group to react faster to their customers lab automation needs with customized solutions. " Hudson Control Group is the leader in microplate automation, while also providing the most advanced, yet rugged robotic technology available to research laboratories." notes Phil Farrelly, President of Hudson Control Group. "We are excited to have the Wagner's represent Hudson and are looking forward to their strong market relationships and experience furthering our sales efforts in Europe".

Located in Springfield, New Jersey, Hudson Control Group is a leader in microplate automation, robotics and customized software-driven solutions. The company works with customers in the drug discovery, high throughput screening, proteomics and genomics markets to develop strategies that best meet their unique needs, whether for an integrated system of automated laboratory equipment or for automating a single instrument.
